

UPDATE: COVID-19

EFFECTIVE ALTERNATIVE TO FIGHT AGAINST COVID-19 : INO BANO 6

Dear customers,

With the Coronavirus pandemic (COVID-19) that is currently spreading across the country, MCS Sanitation is taking responsibility in offering you the best solutions that will allow all citizens to effectively fight against COVID-19.

Currently, there is no product on the market that has an official certification to fight Coronavirus. There is however an effective alternative that resides in the disinfectant product which is INO Bano 6.

Indeed, the INO BANO 6 (Disinfectant & Sanitizer) has characteristics and advantages that are particularly relevant to the COVID-19.

Claims for INO BANO 6 indicate that this product kills canine parvovirus, a virus similar to COVID-19, both coming from animal sources.

Therefore, in terms of disinfection, Health Canada has reported that INO Bano 6 is an excellent alternative for effective disinfection in common areas during this period of spread. We invite you to read the recommended dilution rates for this product.

Dilution rate:

For general disinfection: 1:20

To fight against Parvovirus or Coronavirus (Covid-19): 1:6

We want to thank you for continuing to place your trust in MCS Sanitation. We will continue to keep you informed of significant changes to the current situation.

If you have any questions, please don't hesitate to contact us. We will do our utmost to answer your questions and ask for your understanding in this special situation.

Best regards,

The MCS Sanitation Team
